

Figure 4.

Percentage of People by Health Coverage Type and Selected Characteristics: 2010, 2018, and 2019

(Civilian noninstitutionalized population. If 2018 appears to be missing for a characteristic, then it is within 1.0 percentage point of the 2019 estimate. The difference in the 2018 and 2019 point estimates may still be statistically significant. To determine the significance of these differences, please see Table A-2)

¹ The poverty universe excludes unrelated individuals under the age of 15 such as foster children.
 Note: Differences are calculated with unrounded numbers, which may produce different results from using the rounded values in the figure. The estimates by type of coverage are not mutually exclusive; people can be covered by more than one type of health insurance during the year. For information on confidentiality protection, sampling error, nonsampling error, and definitions in the American Community Survey, see <https://www2.census.gov/programs-surveys/acs/tech_docs/accuracy/ACS_Accuracy_of_Data_2019.pdf>.
